***Kids love to play with water
Everyone wants to be the winner
"We can waste it! It doesn't matter!"
But listen to grandpa, he's wiser***

**Sit down, he says
I'm going to tell you a story
About the olden days**

**It was a long time ago,
In a world without water**

**Where nothing would grow
Where man could not go higher**

**Humans had made Earth so thirsty
That she felt sad and ugly**

**So scientists and leaders got together
Saving the world was the plan
They had trouble to understand each other
They succeeded: so the mission began**

*They decided to look at the sky
And built rockets to go to Mars
Where water was in good supply
Back to Earth across the stars!*

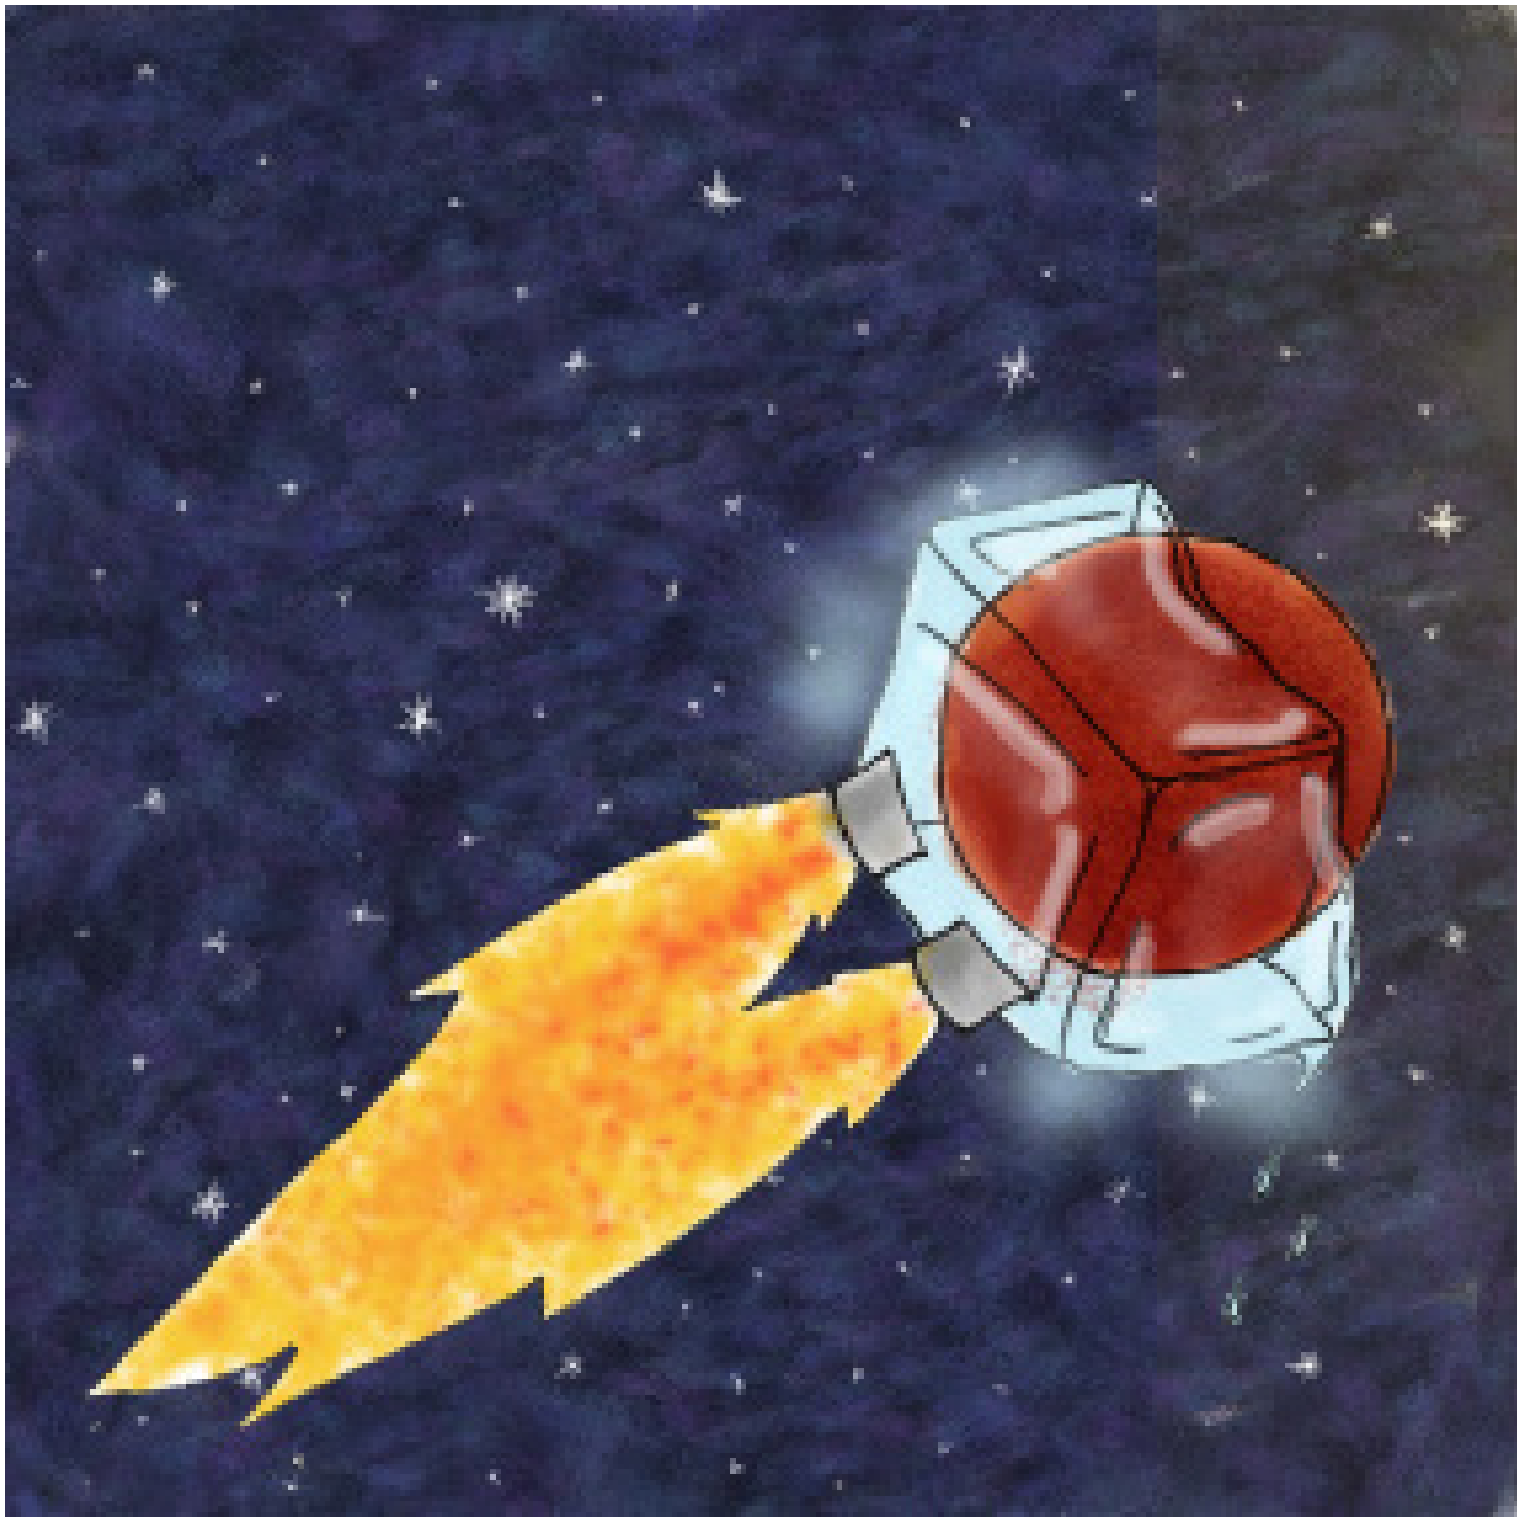

*Did everything go well? Of course not
There was not a single river or sea
Upon arrival, the poor astronauts
found that ice was all they could see*

A large, bright orange sun occupies the right side of the frame, set against a dark blue and black space background filled with numerous small white stars. The sun's surface shows subtle textures and variations in color, ranging from bright orange to a darker, almost black center.

*The solution was the hardest one
They moved Mars with rockets
The goal was reaching the sun
And waiting for the ice to melt*

**Into a giant pipe, the water flowed
To rain from Mars to our home
Oceans and glasses were filled
It was the happiest storm**

**On Earth there was a giant party
Now that everybody was hydrated
Never again would they be thirsty
And so till dawn they danced and celebrated**

That is how Earth was saved
Did you enjoy the story?
Grandpa asked

**Yes, it was really funny
But why didn't they simply
Stop wasting it in the 21st century?**

**You're right, they should have done it
That's why never forget to save water
So water cannot quit**
